

April 24, 2025

The Honorable Glenn “GT” Thompson  
Chairman  
House Committee on Agriculture  
Washington, DC 20515

The Honorable Angie Craig  
Ranking Member  
House Committee on Agriculture  
Washington, DC 20515

Chairman Thompson, and Ranking Member Craig:

We write today to respectfully urge your support for the Training & Nutrition Stability Act which would fix a current law that is preventing Supplemental Nutrition Assistance Program (SNAP) recipients from pursuing valuable job training through SNAP’s Employment and Training (E&T) program.

The bipartisan 2018 Farm Bill strengthened E&T by allowing paid training opportunities and apprenticeships recognizing the effectiveness of transitional jobs and other types of work-based learning that improve job outcomes for populations with high barriers to employment. This change in law enables participants to gain evidence-based work experience and training that helps them find permanent gainful employment and transition away from SNAP benefits. Unfortunately, the temporary E&T “income” participants receive as authorized by this change is being counted toward the determination of SNAP eligibility. As a result, working people in a SNAP Employment & Training program are being kicked off SNAP because they’ve received income from the SNAP E&T program itself. Further, since the SNAP E&T program is exclusive to SNAP enrollees, losing SNAP eligibility means participants can no longer continue in the E&T program and may lose access to the job training program as well.

Certainly Congress did not intend for participation in the SNAP E&T program expansion to negatively affect enrollees’ eligibility for their basic SNAP benefits or ongoing participation in a job training program that ultimately leads to self-sufficiency. To solve this challenge, we respectfully urge your support for excluding temporary income derived from a public workforce training program from SNAP income calculations. There is also precedent for excluding other categories of income from SNAP calculations such as loans with deferred payments (excluding student loans), infrequent/irregular income, or money received from nonrecurring lump-sum payments such as income tax refunds.

In a recent House Agriculture Committee hearing on expanding opportunity through SNAP, Chairman Thompson emphasized the importance of SNAP and quality E&T programs in helping people get high-quality jobs in in-demand industries. He noted that one impactful way to do this is by increasing access to SNAP E&T programs and excluding wages earned from SNAP E&T or other career and technical education programs from counting towards income for SNAP eligibility; “Families should not be forced to choose between keeping their benefits and taking a job or pursuing the training that could lead to long-term financial independence.” Excluding “income” earned in a short-term SNAP E&T program or public workforce program from determining SNAP eligibility through the Training & Nutrition Stability Act is a straightforward fix that will have a major impact for SNAP enrollees’ success in job training and transitioning to permanent employment. It will also pave a smoother path for SNAP recipients to ultimately transition out of the program – a benefit to both the recipient and the American taxpayer.

We thank you and members of your committees for their previous bipartisan support for expanding the SNAP E&T program to quality job-training programs. We hope that same commitment will extend to addressing this unintended consequence and appreciate your and other Members' ongoing interest in fixing this issue in the next Farm Bill. Thank you for your consideration of this matter and please do not hesitate to contact us at [lebacon@ceoworks.org](mailto:lebacon@ceoworks.org) should you have any questions or need more information.

Sincerely,
